PERSONAL PROJECTS

Stock Market Social Media | www.portfoliorater.com

- Social media website to share your stock portfolios built as a SPA with React, real concurrent users.
- Backend REST API built using Node.js, Express, and MongoDB.
- Build and publish stock portfolios which can be liked, commented, and rated. Register to access dashboard which saves your creations and favorited portfolios.
- Stock Market information gathered with Finnhub API.

Shopify Applications | tzipdevstore.myshopify.com

- Two Shopify applications which can be customized in the Shopify merchant admin.
- App A: Voice command application using alanAI in conjunction with the Shopify API for page redirects, search requests, sorting by type, and clearing your cart.
- App B: Sales motivator banner dynamically updates messages based on shopping cart total, used to increase average order size. Merchants have full customization of the banner styles.
- Merchant facing CMS built with React and Shopify Liquid, vanilla JS used in script tag on the frontend facing application.

Exercise Tracking App | www.pixelatedyear.com

- React application built to log exercise routines throughout the year, displayed as a "pixelated" calendar visual.
- Uses Next.js React Framework and Google Firebase as the database.
- Register an account to track the exercise type, intensity, and notes for each day.

Portfolio Website | www.tepeupotter.com

- Preview multiple other full-stack projects and front-end PSDs to HTML on my portfolio website.

WORK EXPERIENCE

Reagent QC Associate II Luminex Corporation

08/2019 - Present

Austin, TX

Biotechnology medical devices company

Achievements/Tasks

- Realized extreme redundancies in report generation and taught myself Visual Basic to code Excel macros to automate the process.
- Edited python scripts in order to extract historical data from proprietary medical devices.
- Wrote additional scripts to automate weekly KPI reports generated by Senior Management.

Scientific Associate, Bioanalysis Worldwide Clinical Trials

01/2018 - 08/2019

Austin, TX

Full service clinical research organization

Achievements/Tasks

- Managed multiple clinical studies simultaneously, requiring flexibility and time-management to meet tight deadlines and shifting priorities.
- Selected as one of two analysts to be cross trained into newly expanded pharmacogenomics department.

EDUCATION

Bachelor of Science, Biochemistry Florida State University

Tallahassee, FL
